

PROTECT AGAINST THE ELEMENTS

CoverSeal's durable fabric is lab tested and can withstand high winds over 40 MPH. Our patented covers are weather-proof, water resistant and repel 95% of UV light, offering maximum protection. CoverSeal covers are designed from breathable material to keep moisture out which prevents mold and mildew damage.

PROTECT AGAINST RODENTS

The durable 600 thread count, non-flammable fabric is heat resistant up to 400F. This allows use even when the barbecue has been recently turned off. The heat resistant fabric will not melt or deform at the typical use temperature. The unique CoverSeal heavy duty weighted tarp apron seals the cover to the ground preventing the ingress of unwanted visitors. CoverSeal BBQ covers are lined with a black interior liner so residual soot or other residue will be concealed, keeping the look of your cover clean.

The ultimate protection for your vehicle & outdoor living.

WE HAVE YOU COVERED FROM THE GROUND UP!
